Profile

Full Stack.NET Developer with over one year of professional experience at BotBat, an Arabic AI solutions platform, specializing in backend development for AI-driven automation systems.

ITI-trained, with hands-on experience delivering production-ready e-commerce and web applications, strong problem-solving skills, and a proven ability to build reliable and efficient solutions within collaborative team environments.

Work Experience

BOTBAT - Arabic AI Solutions Platform, (*Remotely*)

12/2024 – 12/2025

Role: .NET Backend Developer

Responsibilities:

- Architected and supported production-ready RESTful APIs for AI-driven customer service and automation platforms.
- Defined core business rules, handled database operations, and integrated external services leveraging Entity Framework Core and SQL Server.
- Worked closely with cross-functional teams to deliver reliable and efficient server-side services in production environments.

Projects:

- AI Customer Service Automation Platform (Gulf Region) -Designed backend APIs enabling Arabic AI chatbots and automated customer interactions across multiple communication channels.
- Omnichannel Messaging & Analytics System Integrated messaging platforms and data processing services to enable analytics, reporting, and actionable business insights.

Internship

Information Technology Institute (ITI), *Full Stack .NET Developer Trainee*

07/2025 – 11/2025

Mansoura Branch

Projects:

Sehaty-HMS - Hospital Management System [GitHub](#) 

Role: Backend .NET Developer

Responsibilities:

- Engineered backend services to manage appointments, medical records, and billing workflows.
- Applied business rules and domain logic to support healthcare operations.
- Preserved data integrity and tuned database transactions for reliable system performance.

Description: Healthcare management platform centralizing patient appointments, records, prescriptions, and billing to streamline hospital workflows.

Company.MVC - HR Management System [GitHub](#)

Role: Full Stack .NET Developer

Responsibilities:

- Developed and structured MVC and server-side components for employee and department management.
- Built CRUD workflows, validation rules, and relational data models to ensure data consistency.

Description: HR management application handling employee records, salaries, hiring dates, and department hierarchies.

StoreHub.Api - E-Commerce Backend System [GitHub](#)

Role: .NET Backend Developer

Responsibilities:

- Built and sustained RESTful APIs for product catalogs, shopping carts, and order processing.
- Implemented checkout and customer account workflows supporting end-to-end e-commerce operations.
- Optimized secure data access layers using Entity Framework and SQL Server.

Description: Backend services powering an e-commerce platform, enabling product browsing, order processing, and delivery management.

Education

Bachelor's Degree, Computer Science, 09/2019 – 06/2023
Misr Higher Institute for Computer and Commerce

Cumulative Grade: Good

Graduation Project: INKAZ A system designed to enhance travel safety by providing fast emergency support and assistance.

Grade: Excellent

Certificate:

ITI Certificate

Technical Skills

Backend

ASP.NET Core, Web APIs, Entity Framework Core, LINQ, SQL Database, MVC

Concepts

OOP, SOLID Principles, Design Patterns, RESTful APIs, Clean Architecture

Frontend

HTML5, CSS3, JavaScript, Angular

Tools

Git, GitHub, Visual Studio, Visual Studio Code

Soft Skills

- Strong communication and teamwork skills.
- Effective time management and task prioritization.
- Quick adaptability to new technologies.
- Ability to perform well under pressure.
